DIASTAT[®] Indication

DIASTAT[®] AcuDial[™] (diazepam rectal gel) is a gel formulation of diazepam intended for rectal administration in the management of selected, refractory patients with epilepsy, on stable regimens of AEDs, who require intermittent use of diazepam to control bouts of increased seizure activity, for patients 2 years and older.

Important Safety Information

In clinical trials with DIASTAT[®], the most frequent adverse event was somnolence (23%). Less frequent adverse events reported were dizziness, headache, pain, vasodilation, diarrhea, ataxia, incoordination, asthma, rash, abdominal pain, nervousness, and rhinitis (1%-5%).

How to calculate the appropriate individualized dose

The following table provides acceptable weight ranges for each dose and age category, such that patients will receive the maximum beneficial effect—between 90% and 180% of the calculated recommended dose. The safety of this strategy has been established in clinical trials.¹
