Informed Consent: Operation or Other Procedure

Attending/supervising physician: _____

Resident physician (if applicable): _____ Type of supervision: ☐ Direct ☐ Indirect

Operation or procedure: _____

_____

Benefits of this Surgery/Procedure:

Your doctor cannot promise you will receive any benefits. Only you can decide if the benefits are worth the risk.

_____

_____

_____

Risks of this Surgery/Procedure:

No procedure is completely risk free. Some risks are well known. There may be risks that your doctor cannot expect.

_____

_____

_____

General Risks of Surgery/Procedure:

- Small areas of the lungs may collapse. This would increase the risk of infection. This may need antibiotics and breathing treatments.
- Clots may form in the legs, with pain and swelling. These are called DVTs or deep vein thrombosis. Rarely, part of the clot may break off and go to the lungs. This can be fatal.
- A strain on the heart or a stroke may occur.
- Bleeding may occur. If bleeding is excessive, you may need a transfusion.
- Reaction to the anesthetic may occur. The most common reactions are nausea and vomiting. In rare cases, death may occur. The anesthesiologist will discuss this with you.

Information on Moderate Sedation:

You will be given medicine in an IV to relax you. This medicine will also make you more comfortable. This is called "moderate sedation". You will feel sleepy. You may even sleep through parts of your procedure. We will monitor your heart rate and your blood pressure. We will also monitor your oxygen level.

If your heart rate, blood pressure or oxygen levels fall outside the normal range, we may give medications to reverse the sedation. We may be unable to reverse the sedation. We may need to support your breathing.

Even if you have a NO CODE status:

- You may need intubation to support your breathing.
- You may need medications to support your blood pressure.

We will re-evaluate your medical treatment plan and your NO CODE status when sedation has cleared your body.

Risks Associated with smoking:

Smoking is linked to an increased risk of infections. It can also lead to heart and lung complications and clot formation.
